Observations

The risk landscape in Derbyshire is characterised by a high likelihood of trespassing and various forms of violence and abuse, as reflected in the top 10 risks. These risk scores are derived from a combination of demographic, environmental, and historical data inputs, providing an objective measure of the probability of each risk occurring. The highest-rated risks, scoring 7 out of 10, include 'Trespassing - In Hours', 'Violence & Abuse - Sexual Harassment', and 'Public Order - Drug Usage', indicating a significant potential for these issues to arise within the region. These scores suggest a persistent vulnerability in public and private spaces, particularly during operational hours and in contexts involving substance misuse and personal safety threats.

In Derbyshire, the most significant increases from last month to this month are seen in 'Violence and sexual offences', 'Anti-social behaviour', 'Criminal damage and arson', 'Other theft', and 'Robbery', indicating a rise in offences that directly impact public safety and retail environments. 'Violence and sexual offences' and 'Anti-social behaviour' show notable absolute and percentage growth, which is concerning given their potential threat to human safety. Conversely, 'Shoplifting', 'Burglary', 'Public order', 'Vehicle crime', and 'Possession of weapons' have decreased, suggesting some relief in these areas. Crimes such as 'Other crime', 'Drugs', and 'Theft from the person' remain relatively stable with minor fluctuations.
